

KEVIN ZHANG

SENIOR FRONTEND ENGINEER

New York, NY | kevinzhang974@outlook.com | (646) 484-8136 | <https://www.linkedin.com/in/izkevin-09q8427/>

Profile

Senior Frontend Engineer with 7+ years of experience building secure, accessible, and high-performance web products across fintech and e-commerce. Owns frontend architecture from technical discovery and design-system planning through implementation, testing, release, and production measurement. Experienced in React and TypeScript ecosystems, Core Web Vitals optimization, scalable component platforms, and mentoring engineers through pragmatic code reviews and technical guidance. Partners closely with product, design, backend, analytics, security, and compliance teams to translate complex customer journeys into reliable, responsive user experiences.

Experience

AFFIRM | SENIOR FRONTEND ENGINEER | JUNE 2024 – PRESENT

- Architected modular React and TypeScript foundations for customer-facing financing and account-management journeys, standardizing routing, server-state management, analytics, error handling, and feature-flag patterns across multiple product surfaces.
- Spearheaded an incremental migration of legacy frontend packages into a Next.js and Turborepo architecture, cutting average CI build time by approximately 28% while enabling safer, independently versioned releases.
- Optimized route-level code splitting, lazy loading, asset delivery, and rendering pathways, reducing shipped JavaScript by about 21% and improving representative Largest Contentful Paint from approximately 3.0 seconds to 2.2 seconds.
- Engineered reusable, accessible UI primitives with Storybook, design tokens, Radix UI patterns, and automated visual checks, giving product teams a consistent foundation for responsive checkout and servicing experiences.
- Led frontend design reviews, pull-request reviews, release-readiness checks, and production retrospectives while mentoring three engineers on TypeScript design, testing strategy, web performance, and maintainable component boundaries.
- Partnered with product, design, backend, data, security, and compliance stakeholders to deliver pixel-accurate experiences with WCAG 2.1 AA considerations, resilient loading and error states, and measurable product instrumentation.

CHIME | FRONTEND ENGINEER | MAY 2020 – JUNE 2024

- Engineered React and TypeScript experiences for member onboarding, identity verification, card management, transaction history, and account servicing, translating regulated financial workflows into clear, mobile-first user journeys.
- Orchestrated adoption of Redux Toolkit and React Query patterns for shared client and server state, consolidating duplicated request logic and improving consistency across loading, caching, mutation, and error-recovery behavior.
- Built experimentation-ready onboarding components with analytics hooks and controlled rollout support, contributing to an approximately 6% improvement in completion for a targeted registration flow.

- Created reusable form, modal, navigation, notification, and data-display components in partnership with design, reducing repeated implementation effort and shortening delivery time for comparable features by approximately 20%.
- Added Jest, React Testing Library, and Cypress coverage for critical onboarding journeys and integrated the suites into CI quality gates.
- Collaborated with backend, risk, fraud, legal, accessibility, and customer-support teams to define API contracts, handle edge cases, and deliver compliant experiences across desktop and mobile breakpoints.

WAYFAIR | FRONTEND DEVELOPER | JUNE 2019 – MAY 2020

- Developed responsive React interfaces for merchandising, category navigation, product discovery, and product-detail experiences used across high-traffic e-commerce pages.
- Optimized component rendering, image loading, and Webpack bundles to improve page responsiveness and reduce load time by approximately 18% on selected merchandising experiences.
- Implemented reusable filters, promotional modules, product cards, and experiment variants from Figma specifications while maintaining consistent behavior across supported browsers and screen sizes.
- Expanded Jest and React Testing Library coverage for shared components and core shopping interactions, improving maintainability and helping engineers detect regressions before release.
- Worked with product managers, UX designers, analytics partners, API engineers, and QA to deliver incremental releases, evaluate experiment results, and refine customer-facing behavior.

Education

BACHELOR OF ENGINEERING, SOFTWARE ENGINEERING

APRIL 2015 – MARCH 2019 | **CONCORDIA UNIVERSITY**

Skills & Abilities

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass/SCSS
- **Frameworks and State Management:** React, Next.js, Remix, Redux Toolkit, Zustand, TanStack Query, React Router
- **Architecture and Performance:** Core Web Vitals, SSR, SSG, code splitting, lazy loading, micro-frontends, design systems, responsive architecture
- **UI and Accessibility:** Tailwind CSS, CSS Modules, Styled Components, Radix UI, shadcn/ui, Storybook, WCAG 2.1, ARIA, accessibility testing
- **Testing:** Jest, Vitest, React Testing Library, Cypress, Playwright, unit testing, integration testing, end-to-end testing
- **Tooling and Cloud:** Vite, Webpack, Turborepo, GitHub Actions, CI/CD, Vercel, AWS, Git, npm, pnpm, performance monitoring
- **APIs and Collaboration:** REST, GraphQL, OpenAPI, Figma, Agile/Scrum, technical discovery, code reviews, mentoring, cross-functional delivery
